

FIRE SPRINKLER 2008 is the first conference arranged by BAFSA since 2006 and is the only UK event dedicated to an examination of the use of sprinklers as the most effective means of protecting people, property and the environment.

FIRE SPRINKLER 2008 is an important event for all UK fire safety professionals and Thursday 13 November should be a vital date in your diary. The event follows the 2008 BAFSA AGM and Dinner at the same location of 12 November.

FIRE SPRINKLER 2008 will bring together a wide range of those with an interest in the subject and allow critical examination of current trends in the use of sprinklers, research into more effective use of sprinklers and possible changes in the legal requirement to provide sprinklers in a wider range of building occupancies.

An exhibition of products and services offered by the most important companies in the sprinkler field will complement your day and add to the total experience.

If you are interested in taking a "table top" stand at the exhibition please contact Wendy Otway on 01795 530111 or email her on firesprinkler2008@btinternet.com
