Fire sprinklers will protect my family & the things we love
Automatic fire sprinklers kill fires

We should not...

- Take the batteries out of the smoke alarms
- Place electrical cables under carpets
- Leave cooking unattended
- Leave matches & lighters where children play
- Smoke in bed
- Overload sockets
- Leave portable heaters near bed
- Remove flat plates covering sprinkler heads
- Place curtains near hot spots
- Smoke in bed
- Leave matches & lighters where children play

We should...

- Have smoke alarms in every room
- Check the smoke alarms every week
- Fit a carbon monoxide alarm
- Make sure fire escape routes are clear
- Keep fire escape routes clear
- Switch off the oven & hob after cooking
- Make sure fire escape routes are clear
- Keep tea towels & cloths away from the cooker
- Make sure fire escape routes are clear

To keep me and our home safe from fire

- Close downstairs doors overnight
- Study our escape plan in an emergency
- Close downstairs doors overnight
- Turn off portable heaters before bed
- Switch off the oven & hob after cooking
- Make sure fire escape routes are clear
- Keep tea towels & cloths away from the cooker
- Make sure fire escape routes are clear
- Keep tea towels & cloths away from the cooker
- Make sure fire escape routes are clear
Each sprinkler protects an area below and is activated by the heat of a fire.

Only the sprinkler closest to the fire will activate, spraying water directly on the fire.

One sprinkler will keep you safe from fire in your bedroom.

In a larger room there may be more sprinklers to control a fire.

Sprinklers are good for the planet too:
- Lower greenhouse gas emissions
- Fight a fire using less water
- Less fire damage so less waste in landfills
- Reduce run off water pollution

Fire sprinklers ... ask for them – live with them
Sprinklers put water where it is needed

Sprinklers stop spreading flames and heat damage everything.

Sprinklers control the spread of deadly smoke.

Sprinklers stop them.
