

# SFJ IQ Level 2 EWR Certificate in Fire Sprinkler Installation Portfolio (template)

Whilst it is difficult to predict what will be encountered on-the-job, the work experience must be suitably varied to ensure that the person did not do the same thing day after day.

The portfolio should provide evidence of real-world work experience gained by the candidate.

Successful completion of the “Evidence of prior learning” Training Record will enable candidates once Verified to attend the assessment centre and undertake the assessment of competence within the college

The numbers of days stated below are notional guidelines. It is more beneficial to gather a range of evidence from areas in the Fire Sprinkler Installers industry.

Task	No. of jobs	Completed
New Installation	5	
Existing Installation	5	
Maintenance	5	
Servicing	5	
<b>Joining Techniques</b>		
Roll Grooved Joints	5	
Threaded Joints	5	
Handover	2
